

Project based Learning Outcomes

For CBSE and ICSE State Board students

Research skills

Through this internship project, you will develop ability to engage in personal inquiry by researching and exploring complex topics. This process will enhance your critical thinking and analytical skills, enabling you to ask insightful questions, identify key issues, and seek comprehensive answers.

Reflection

You will develop the ability to gain and reflect on knowledge, which will pave the way for identifying future areas of interest. This reflective process will enhance your self-awareness, critical thinking, and strategic planning skills.

Thinking skills

You will develop the ability to think critically, analyse, and evaluate real-world scenarios through the application of theoretical constructs and arguments. This will enhance your problem-solving skills and your ability to bridge the gap between theory and practice.

Critical thinking skills

You will develop the ability to critically think through complex problems and demonstrate the application of critical and creative thinking skills. Using a dialectical thought process, you will produce an independent and extended piece of work that showcases your analytical and innovative capabilities.

Creative thinking skills

You will cultivate the ability to develop creative thinking skills that initiate actionable solutions to solve problems. This process will enhance your innovation and problem-solving capabilities, empowering you to approach challenges with originality and effectiveness.

Communication skills

You will enhance your communication skills across four key areas: Listening, Speaking, Reading, and Writing (LSRW). These skills will enable you to argue logically and effectively, making your communication clear, persuasive, and impactful.
